

# Technical Project Manager

Israel · Full-time

## About The Position

AllCloud, world's leading cloud solutions provider specializing in cloud stack, infrastructure, platform, and Software-as-a-Service is looking for a Delivery Manager to join our Engage Program to lead and implement projects and business processes for our customers located in the EMEA region.

The Technical Project Manager will be responsible for planning, monitoring and delivering both customer-facing and infrastructure projects, according to a planned schedule, scope, and quality, as well as identifying and resolving issues, conflicts, and managing the day-to-day coordination of all teams.

## Main Responsibilities

- Build and lead project plans; supervise and review project progress and timelines; adjust schedules and plans as needed; ensure on time and on budget delivery of projects and identify and resolve issues to ensure project success.
- Coordinate and facilitate Agile ceremonies such as daily standup, sprint planning, sprint reviews, and sprint retrospective.
- Driving projects and sprints towards delivery by taking a proactive approach.
- Serve as the primary point with our customers, stakeholders, and integration teams to ensure delivery is smooth and customer-centric.

## Requirements

- 2-3 years of proven experience in delivering technological assets as a Delivery Manager, Project Manager or CSM.
- Familiarity with project and operational tools such as Jira, Smartsheet & Salesforce.
- Solid knowledge and previous experience in Agile project management methodology.
- Strong communication and great interpersonal skills with the ability to work remotely.
- Ability to work under pressure with tight timelines while maintaining cooperative attitude through pressured situations.
- Highly organized personal with great attention to details including methodological thinking.
- Proficiency with English

## Advantages

- Sufficient background in IT (i.e. cloud computing, networking, security)
- Previous leadership experience or people management.
- Working experience in customer-facing roles.
- SCRUM or any other project management certification.

## Benefits

- Company events with our international team.
- Work-Life-Balance & trust working hours.
- Fair pay and bonuses.
- Regular (completely optional) after-work team events such as playing ping-pong, dinners, and drinks.
- Support for education and training to further develop your profession together with an internal AWS Trainer.
- Work with cutting edge technologies.
- High-end equipment.
- A creative atmosphere, which makes it possible to pursue your own ideas.
